

First Nation Code Clubs

First Nation Code Clubs provide indigenous kids and youth with opportunities to learn in-demand skills at a time when they may be thinking about what they want to do when they finish school.

FNCC will introduce programming and technology to a new generation of coders who, rather than missing out, will become builders of leading edge applications and their own futures. Imagine the impact that these curious, creative minds could have on the world with the guidance and encouragement others take for granted.
